

Coronavirus Social story

Sometimes, people get poorly.
At the moment, lots of people are getting
poorly

There is a new illness called coronavirus which is making people poorly in lots of different places all over the world.

You may have heard people talking about it on the television.

- Coronavirus is making lots of people poorly.
- People with coronavirus may have a high temperature or a cough.

- To keep healthy, you need to wash your hands throughout the day to keep them clean.
- You need to wash your hands for 20 seconds.
- Your parents/carers and staff will help you with working out the best way to make sure you wash them for 20 seconds.

- If you cough or sneeze, you should cover your mouth and nose with a tissue.
- put the tissue in the bin and then wash your hands.

Sometimes when people are ill, they need time at home to get better.

This is OK.

When lots of people are ill at the same time, schools and busy places like shops may close.

This is OK.

Closing schools and busy places may help stop coronavirus spreading.

At Isebrook

Some students and staff may feel poorly and have to stay at home.

This is O.K

This is because they need to get better.

If some staff and students have to stay at home, there may be changes in school.

- There may be changes to who the adults are in your class
- There may be changes to your timetable

This is O.K, the adults in school can support you with this

To keep healthy, I need to cover my mouth with a tissue when I cough or sneeze, wash my hands and I may need to stay at home.

This is OK.

My parents/carers and staff will be proud of me for doing this.

If you feel poorly when you are at school please speak to an adult and they will help you.
